

## **Project Update, as of 1/23/2023**

### **Inquiries on “AVOID” Marking on Marine Corps Drive**

The transport of heavy haul components for the new Ukudu Power Plant on Rt. 1, Marine Corps Drive, will be scheduled and occurring shortly. In preparation for the transport, manhole covers along the pathway have been marked with white paint with the word “AVOID.” This is not meant for the driving public as it is safe to traverse over those marked areas. The markings are instructional and only intended for the operators of the Self-Propelled Modular Trailers (SPMT), which will be carrying the components on the day of the transport. Doosan Ukudu Power and Doosan Enerbility thank you for your patience and ask you always to drive safely.
